
PEGASO VIÑAS VIEJAS / Cebreros

Pegaso Granito (2015)

Finca la Piñonera
05260 Cebreros, Ávila

The Granito vineyards are usually found on shallow soils of magmatic origin. This type of soil is mostly found at an altitude of 800 to 1000 meters. Granito wines are more accessible, fruitier and of silkier and more delicate structure.

REGION

Sierra de Gredos

VILLAGE

Cebreros (Ávila)

PLACES

El Robledillo, El Mojón

VARIETIES

100% Garnacha

VITICULTURE

Traditional, organic. Very old bushvines. Manual harvest in small boxes.

ELABORATION AND AGING

Native yeasts. 18/24 months in 600 liters French oak barrels from different forests and origins.

SOILS

Located between 800 and 1000 m of altitude. Granites of magmatic origin. Shallow, coarse textured soils with a low water retention capacity.

VINTAGE CHARACTERISTICS

2015 was probably the warmest vintage in the history of Spain. It is precisely in vintages like this one when the old vines show all their singularity and adaptability. Between April and August we had high temperatures and even drought. Thanks to rains at the beginning of September which refreshed the vines and the grapes, production was healthy and generous. We are happy with the results of this challenging vintage.
